

MUHAMMAD TALHA TOHEED

Emergency Medicine Physician | MBBS | GMC Licensed | DHA Eligible

+92 332 4576243 | mtt.475@hotmail.com | linkedin.com/in/muhammad-talha-toheed-4b13912b7

PROFESSIONAL SUMMARY

GMC-registered Emergency Medicine Physician with MRCEM Primary completed, DHA eligibility, and 3+ years of frontline experience across high-volume Accident & Emergency departments in Pakistan. Skilled in acute resuscitation, advanced airway management, trauma care, and multidisciplinary team leadership. Currently leading an active Quality Improvement Project in the A&E department, building directly on structured NHS observership exposure to Cerner EHR, NICE guidelines, and clinical governance frameworks in the United Kingdom.

LICENSES & CERTIFICATIONS

- General Medical Council (GMC) — Full Registration, United Kingdom
- Dubai Health Authority (DHA) — Eligibility Certificate (Emergency Medicine)
- Pakistan Medical & Dental Council (PMDC) — Registered Medical Practitioner
- American Heart Association — Advanced Cardiovascular Life Support (ACLS)
- American Heart Association — Basic Life Support (BLS)
- MRCEM Primary — Exam Completed, Result Awaited

CLINICAL EXPERIENCE

Imran Idrees Teaching Hospital, Sialkot

Aug 2024 – Jul 2025 **Medical Officer — Accident & Emergency**

- Assessed and managed 20–25 patients per shift covering acute medical, surgical, trauma, and paediatric emergencies in a busy tertiary-care A&E setting.
- Performed independent bedside procedures including endotracheal intubation, central line insertion, FAST ultrasound, arterial blood gas sampling, and sepsis protocol activation.
- Led triage, resuscitation bays, and patient streaming — ensuring critically ill patients received timely, evidence-based interventions and appropriate specialty referrals.
- Supervised and mentored junior doctors and nursing staff through bedside teaching, direct feedback, and clinical handovers.
- Coordinated with surgical, medical, and paediatric teams to facilitate smooth admissions, accurate documentation, and continuity of care.

Imran Idrees Teaching Hospital, Sialkot

Dec 2025 – Present **Medical Officer — Accident & Emergency**

- Rejoined the department following an NHS observership in the United Kingdom, resuming frontline emergency care responsibilities across acute medical, surgical, trauma, and paediatric presentations.
- Leading an active Quality Improvement Project within the A&E department — applying clinical audit methodology and NHS governance frameworks acquired during the UK observership to drive measurable service improvements.

National Hospital, Lahore

Feb 2023 – May 2024 **Medical Officer — Accident & Emergency**

- Delivered frontline emergency care across trauma, medical, and surgical presentations — conducting initial assessments, patient optimisation, and consultant-directed management plans.
- Performed and assisted in minor surgical and bedside procedures under consultant supervision, maintaining accurate procedural and clinical documentation.
- Collaborated effectively within multidisciplinary teams, ensuring structured patient handovers and adherence to departmental protocols.

Shabir Hospital, Lahore

Sep 2022 – Feb 2023 **Medical Officer — Accident & Emergency**

- Conducted rapid initial assessments of emergency presentations, determined acuity levels, and coordinated timely referrals to tertiary care hospitals.

- Liaised with consultants for patient optimisation and carried out all prescribed orders, ensuring safe transitions between care settings.

Services Hospital, Lahore

Aug 2021 – Jul 2022 **House Officer (Internship)**

- Completed structured rotations across General Medicine, General Surgery, Paediatrics, and Radiology — building a broad clinical foundation across diverse specialties.

NHS OBSERVERSHIP & PROFESSIONAL DEVELOPMENT

United Kingdom — Emergency Department Observership

Nov 2025 – Dec 2025

- Completed 22 structured e-learning modules covering NHS guidelines, clinical governance, and departmental policies prior to commencement.
- Observed SHOs and Registrars across Resus, Red Zone, Green Zone, Blue Zone, and QED — gaining practical insight into NHS emergency workflows and patient flow management.
- Developed proficiency with the Cerner electronic health record system, including clinical documentation, investigation ordering, and results review in line with NICE guidelines.
- Participated in patient triage and streaming, history taking, and physical examinations under senior clinician supervision.
- Attended consultant-led teaching sessions, departmental meetings, and handovers — acquiring familiarity with QIP frameworks and clinical audit processes.
