

JAN PENDATUN A. ISMAEL

Respiratory Therapist

janismael19@gmail.com | 09677720608

CAREER PROFILE

With 2 years of hands-on experience in tertiary hospital providing respiratory care to diverse patient populations in acute, critical, and diagnostic settings. Proficient in assessing patients' respiratory status, administering oxygen therapy, managing mechanical ventilation, and performing pulmonary function tests. Demonstrates excellent communication, critical thinking, and problem-solving skills, with a passion for improving respiratory health and patient quality of life.

SKILLS

- Arterial Blood Gas Extraction and Analysis
- Cardiopulmonary Resuscitation
- Pulmonary Function Test
- Patient Assessment
- Emergency Response
- Oxygen Therapy
- Aerosol Therapy
- Ventilator Management

PROFESSIONAL EXPERIENCE

RESPIRATORY THERAPIST I

VRP Medical Center

Manila, Philippines

April 2024 - Present

- Administer comprehensive respiratory care, including oxygen therapy, aerosol treatments, chest physiotherapy, and airway management.
- Educate patients and families on respiratory treatments, equipment usage, and disease management to support long-term care outcomes.
- Monitor patients on mechanical ventilation, perform ventilator checks, analyze ABGs, and make data-driven ventilator adjustments to optimize oxygenation and ventilation.
- Respond to Code Blue and Rapid Response calls, providing immediate respiratory support including bag-mask ventilation and airway clearance techniques.
- Perform comprehensive Pulmonary Function Tests (PFTs), and interpret basic results to support physicians in diagnosing and managing respiratory diseases

CLINICAL EXPERIENCE

RESPIRATORY THERAPIST INTERN

Philippine Children's Medical Center

Quezon City, Philippines

May 2023 – September 2023

- Deliver wide range of cardiopulmonary therapies including oxygen administration, nebulized medications, and airway management.
- Implement chest physiotherapy techniques to mobilize secretions and improve lung function.
- Conduct neonatal screening procedures, such as CCHD (Critical Congenital Heart Disease) monitoring, and promptly report abnormal findings.
- Monitor and assess patients on mechanical ventilation using capnography and arterial blood gas analysis to guide with ventilator adjustments.

Far Eastern University Nicanor Reyes Medical Foundation

Quezon City, Philippines

December 2022 – April 2023

- Maintained safety of the patients, identified, and help to prevent the spread of areas of elevated risk.
- Manage inventory of the machines and other respiratory equipment needed.
- Assisting medications, suctioning, monitoring patients, charting and transportation.

EDUCATION

UNIVERSIDAD DE ZAMBOANGA

Bachelor of Science in Respiratory Therapy

2018-2023

OTHER QUALIFICATION

- Registered Respiratory Therapist
- Basic Life Support (BLS) with Automated External Defibrillator (AED) Seminar/Workshop
